# FOR UPIM QUALITY IS AN ESSENTIAL PRE-REQUISITE

**The quality of the products is guaranteed by laboratory tests** and checks carried out every year by independent suppliers and institutions, to guarantee that the quality meets up the internal standards and the current legislation regarding the production, materials and procedures. Many of the Blukids children wear and underwear are **certified by Oeko – Tex** (class I and II) to ensure no harmful substances are used.

## SUSTAINABILITY AT THE CENTRE

Upim placed sustainable innovation at the centre of its manufacturing activities, aware of its importance for **the environment's future**. Starting from the FW21 collection, 100% of the cotton used by Upim is certified organic, recycled or originating from BCI cultivations.

OVS SpA is the first Italian company that supported the **Better Cotton Initiative** (BCI), the international organisation that aims at radically improving the impact of the global cotton industry on the ecosystem and people. BCI included it among its 15 "**Better Cotton Leaders**" in 2018.

WE ARE DOING OUR PART TO REDUCE THE IMPACT OF FASHION ON THE PLANET'S ECOSYSTEMS BY MAKING OUR PRODUCTS MORE ENVIRONMENTALLY AND SOCIALLY SUSTAINABLE.

90%

By 2025, 90% of our products will have a **low environmental impact**

100%

100% of **our cotton is more sustainable**. We only use **organic cotton** or cotton grown **according to the bci guidelines**

100%

By 2025, 100% of our **denim will be waterless** (i.e., produced using low water consumption processes).

2025

# REAL SYSTEM CHANGE ONLY OCCURS IF EVERYONE COOPERATES

**We want to contribute to a shared approach, strengthened by individual alliances and partnerships. We actively participate in international initiatives to improve sustainability in the fashion industry.**

We believed in the Sustainable Apparel Coalition (SAC) from the start and were the first Italian fashion company to join in 2017. The Sustainable Apparel Coalition works to develop and promote sustainable practices and transparency in the fashion industry.

OVS is the only Italian company to have signed up to the 2017 Circular Fashion System Commitment, an initiative promoted by the Global Fashion Agenda to speed up our transition to circular fashion. In 2020, we signed the Circular Fashion Partnership with the aim of completing a concrete case study in Bangladesh to demonstrate the competitive value of circular technologies on the market.

# TRANSPARENCY IS THE ESSENTIAL PREREQUISITE FOR MAKING ANY DECLARATION OF COMMITMENT

**After a long journey, our commitment to creating clothing in a transparent way is recognized by the first place in the 2021 global ranking of Fashion Transparency Index.**

For us, transparency is about sharing clear information on materials, suppliers and production countries with our customers on OVS.it. The materials and resources we use (and re-use), our relationships with suppliers, and the people involved in our supply chain all have a part to play in the environmental and social "journey" of our products. We want our customers to be the protagonists of this journey by enabling them to make informed choices, every single day.

## ECO VALORE

### 1. Water consumption

### 2. CO2 emissions
